

# Appeal for Installation of 10 Water Hand Pumps in Coastal Area of Badin, Sindh

**Youth For Pakistan** and **Yashfa** appeal for your support in our initiative to install 10 water hand pumps in the coastal area of Badin, Sindh, Pakistan. This region, characterized by its unique geography and socioeconomic challenges, is in dire need of sustainable water solutions.

The coastal communities of Badin face significant hardships in accessing clean and safe drinking water. Many families rely on contaminated sources, leading to severe health issues, particularly among children and vulnerable populations. The installation of water hand pumps will provide a reliable and safe water supply, greatly improving the health and well-being of these communities.

Our proposed project aims to:

- 1. Provide Access to Clean Water:** The installation of 10 water hand pumps will ensure that approximately [insert number] families have direct access to safe drinking water, significantly reducing waterborne diseases.
- 2. Promote Hygiene and Sanitation:** Access to clean water will enhance hygiene practices, contributing to better overall health and sanitation within the community.
- 3. Empower Local Communities:** We believe that empowering local communities to manage their water resources fosters a sense of ownership and responsibility, leading to sustainable practices and long-term benefits.

To successfully implement this project, we are seeking financial and logistical support from individuals, organizations, and local authorities. The estimated cost for installing 10 water hand pumps, including maintenance and community training, is [insert amount]. Your support can make a significant difference in the lives of these families, and we would be grateful for any contribution you can provide.

## Budget for Installation of 20 Water Hand Pumps

Budget for the installation of 20 water hand pumps in the coastal area of Badin, Sindh, Pakistan.

| Item                        | Quantity   | Unit Cost (PKR) | Total Cost (PKR)  |
|-----------------------------|------------|-----------------|-------------------|
| Water Hand Pumps            | 10         | 20,000          | 200,000           |
| Installation Costs          | 10         | 5,000           | 50,000            |
| Transportation              | -          | -               | 10,000            |
| Community Training Sessions | 1 sessions | -               | 10,000            |
| Maintenance Kit             | 10         | 2,000           | 20,000            |
| Administrative Costs        | -          | -               | 15,000            |
| <b>Total Estimated Cost</b> | -          | 27,000          | <b>Rs 305,000</b> |

## Budget Breakdown

- 1. Water Hand Pumps:** This includes the purchase cost of 10 water hand pumps designed for community use.
- 2. Installation Costs:** This covers labor costs associated with the installation of each pump, ensuring that they are properly set up and functional.
- 3. Transportation:** Costs for transporting the pumps and installation materials to the coastal areas of Badin.

4. **Community Training Sessions:** Conducting training sessions for local community members on the proper use and maintenance of the pumps. This ensures that the community can take ownership and maintain the pumps over time.
5. **Maintenance Kit:** Provision of essential maintenance kits for each pump, including tools and replacement parts that may be needed for upkeep.
6. **Administrative Costs:** This includes overhead costs associated with project management, communication, and coordination among stakeholders.
